HTT MULTI™ EAF MANIPULATOR SLAG DOOR CLEANING AND SERVICE

Robust and efficient solution for
your EAF area service

FEATURES

- › Mobile machine for slag door / breast cleaning and repair
- › Scrap pusher
- › Slag debris cleaner
- › EAF platform cleaning
- › Easy operation and control
- › Remote control operation available

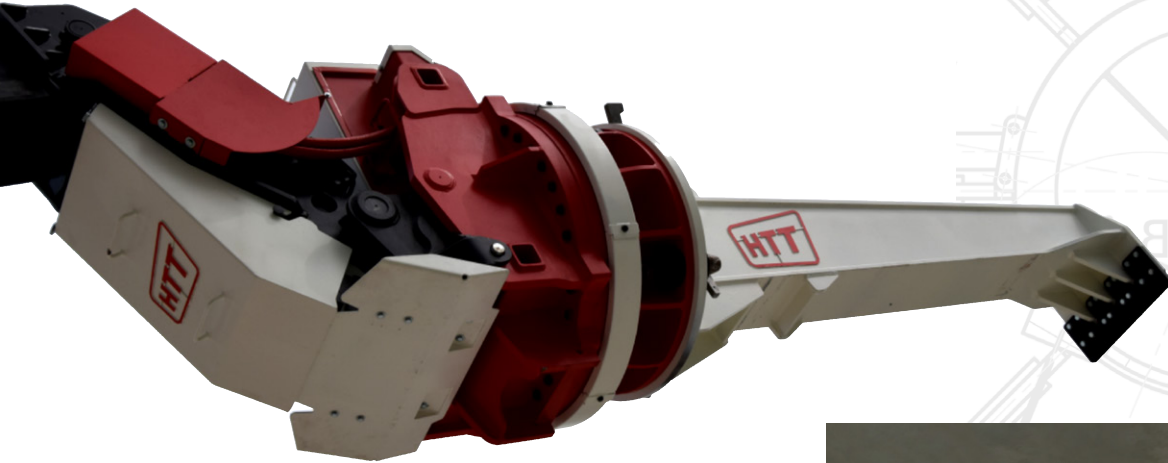

BENEFITS

- › Powerful tool for slag door cleaning
- › Handles hard slag debris such as from stainless steel production
- › Accurate control by joystick
- › Pushing by hydraulic cylinder without need to move machine – less risk of refractory or door panels damage compared to fork lift solution
- › Mobile unit can be used for different furnaces
- › Replaceable tools for multi purposes - charging, breast repair, scrap pushing, cleaning
- › Moving car based on standard telescopic handler platform
